The Inter-American Foundation (IAF), an independent agency of the United States government, was created in 1969 as an experimental U.S. foreign assistance program. The IAF works in Latin America and the Caribbean to promote equitable, participatory, and sustainable self-help development by awarding grants directly to local organizations throughout the region. It also enters into partnerships with public- and private-sector entities to scale up support and mobilize local, national, and international resources for grassroots development. From all of its innovative funding experiences, the IAF extracts lessons learned and best practices to share with other donors and development practitioners throughout the hemisphere.

The IAF is governed by a nine-person Board of Directors appointed by the President of the United States. Six members are drawn from the private sector and three from the federal government. The president of the IAF is appointed by the Board of Directors.

The Foundation’s operating budget consists of congressional appropriations and funds derived through the Social Progress Trust Fund. The IAF’s Fiscal Year 1998 operating budget was $30 million. Since 1972, the IAF has made 4,157 grants totaling $480 million. The Foundation’s 57 staff members are based in Arlington, Virginia.

Business as a partner in development has become a core tenet of the Inter-American Foundation’s program. In 1991, the Foundation began to pursue this innovative approach to development by promoting partnership formations with private sector entities to co-finance grassroots development efforts. Most of the Foundation’s initial efforts to leverage more resources for grassroots development were directed at Latin American and Caribbean companies. These first attempts were successful, resulting in a variety of collaborative ventures with the business sector in Venezuela, Argentina, Colombia, and Peru.

The notion that the private sector in Latin America and the Caribbean would invest in local development has proved worthwhile. Business executives increasingly recognize that their companies’ participation in development programs at the local, community level is essential to the future well-being of their societies. Leaders in the business community realize that social investment is not charity, but a form of enlightened self-interest that yields dividends. The benefits of social investment are mutual, since business reaps financial benefits from social investments that contribute to healthy, stable, and democratic societies. These are the necessary conditions to ensure open markets, free trade, and genuine sustainable development.

To this end, the Foundation initiated a program in Fiscal Year 1998 to promote social investment by international corporations, especially U.S. companies, that operate in Latin America and the Caribbean. In short, the Foundation’s Corporate Outreach Initiative seeks to establish co-financing partnerships with U.S. and other international corporations to support grassroots development. Programs are generated using the Foundation’s methodology, project selection criteria, and results tracking and measurement system.

Corporations, by their very nature, seek the highest return possible on their investments, whether business or socially focused. With nearly three decades of grassroots development experience, the Foundation is well positioned to help corporations maximize the return on their social investments. Primarily through the use and transference of its proven methodology and expertise, the Foundation can greatly enhance a corporation’s ability to target social investments in a manner that produces the most effective, sustainable, and measurable results possible.

The Inter-American Foundation’s Corporate Outreach Initiative is premised on the assumption that the corporate community is ready to engage in meaningful social investments overseas. I believe this assumption to be true, and the results of the Foundation’s work for Fiscal Year 1998 testify to its validity. Although the Foundation’s Corporate Outreach Initiative has been underway for less than a year, two U.S. corporations with global operations have entered into co-financing partnerships with the Foundation to support local development programs in Latin America and the Caribbean. One is AMOCO Corporation, a major international oil company and the other, AES Corporation, is the largest private supplier of electrical power in the world. Both corporations are actively committed to social responsibility. The Levi-Strauss Foundation also made a financial donation directly to the Inter-American Foundation to support projects in Mexico. As I write, several other co-financing opportunities are in the negotiation stage and should be subjects of the Foundation’s 1999 Year in Review.

As public resources and U.S. foreign assistance diminish, corporate social investment will be an increasingly important source of support for development and democracy building at the grassroots level. Likewise, the
The growing global economy is changing the nature of development. In 1990, the total of direct foreign investment in developing countries was more than external aid from all sources. By 1998, private sector investment in developing countries was five times greater than in 1990, far surpassing the rate of external assistance.

Clearly, the private sector should not be ignored as a tool for development. For that reason, the Foundation’s development strategy seeks to bring together business and the more traditional agents of development, the public and the non-governmental sectors, in support of development projects traditionally funded by the Foundation. In Latin America, non-governmental organizations over the past 15 years have been essential to the consolidation of democracy and state reforms. Non-governmental organizations can provide insight into the economic, social, environmental, and political challenges confronting communities, and suggest creative solutions to those problems. This is an axiom the Inter-American Foundation introduced to the development world in 1976, in the manual, They Know How..., which is as applicable today as it was over 20 years ago.

The Inter-American Foundation is firmly committed to apply its resources and expertise to encourage local, U.S., and other international corporations to support community development efforts in Latin America and the Caribbean. A special emphasis of this effort will be placed on the U.S. corporate community, which has much to offer and much to gain in helping strengthen societies in Latin America and the Caribbean—the fastest growing market in the world for U.S. goods and services.

I look forward to building on the Foundation’s success in the establishment of partnerships with the corporate community and expanding the resources available for grassroots development. We all gain from investing in development.

George A. Evans
President

(Photo: Daniel Cima)
Overview 1998

Bringing together communities, governments, and businesses to invest in development was the primary objective of the Inter-American Foundation (IAF) in Fiscal Year 1998. The IAF redoubled its efforts to support those organizations forging innovative cross-sectoral alliances because these partnerships have become a valuable tool for sustainable development in Latin America and the Caribbean. Partnerships complement the economic and social transformations that are the consequence of democratization, decentralization, privatization, and shifting responsibilities between state and society.

While each country in the region has its particular circumstances, there has been a general trend in the last decade towards localized decision-making. As a result, a community dynamic has emerged based upon the increasing authority of local government and a strengthened civil society comprised of business associations, trade groups, neighborhood organizations, non-governmental organizations (NGOs), and private foundations. Democracy in the region has been invigorated by the increasing number of mayoral elections. Previously, mayors in several Latin American and Caribbean countries were appointed to their positions. At the local level public, private, and non-governmental entities have become more pro-active in determining their common welfare. For them, poverty remains the primary challenge in a region where approximately 150 million people, one out of every three individuals, currently live on less than $2 a day.

**Partnerships complement the economic and social transformations that are the consequence of democratization, decentralization, privatization, and shifting responsibilities between state and society.**

Community leaders increasingly recognize that alone, no sector can confront the hazards of poverty: environmental degradation, illiteracy, poor housing, malnutrition, poor education, and inadequate health care. Working together, however, each sector can contribute its comparative advantage and resources for the benefit of the whole, and thus establish a pattern of growth. In support of these partnerships, the IAF obligated 84 grants, 14 grant supplements, and carried out other program activities totaling $20 million in support of development strategies that engaged diverse partners in grassroots initiatives. The following are examples of these creative alliances at work:

In El Salvador, the Fundación Salvadoreña de Apoyo Integral (FUSAI), a multiple service foundation that specializes in credit and self-help housing, is coordinating a successful model of collaboration. FUSAI, together with the city government of Nejapa, El Salvador, the Consejo para el Desarrollo de Nejapa (CDN), comprised of 52 community organizations, eight cooperatives, and four NGOs, as well as two local businesses, Nejapa Power/Coastal Technologies and EMBOSALVA/Coca-Cola, established a local development fund to finance and leverage resources for priority community projects. Together they participate in all decisions related to the management of the fund, which was capitalized by an IAF grant and matching contributions by the two enterprises. Initial projects include the reforestation of the Campantepueque Hill surrounding the town of Nejapa, and a housing program that will benefit 780 families. The projects will leverage municipal funds and resources from the National Fund for Popular Housing, in addition to the support of the community. The Swedish government has signaled its intention to provide additional capital to the fund.

For over 50 years, ARCOR, s.a.i.c., a candy manufacturer with headquarters in Córdoba, Argentina, with annual sales over US$ 1 billion, had the tradition of encouraging its employees to contribute to their community through activities such as volunteering in fire departments and helping to build schools and health clinics. In 1991, ARCOR formalized this philanthropic ethic and launched the Fundación ARCOR. The Fundación ARCOR has established a development fund to provide small grants to community organizations and NGOs located in Córdoba. These NGOs work on health and nutrition issues affecting disadvantaged youths and offer them vocational training.

In Guatemala, the Asociación de Comités de Desarrollo Rural Temalense (ACODERT), is working with the San Juan Agroexport Company to increase the income of ACODERT’s low-income, farm-family members. In this partnership, ACODERT provides small loans for the installation of micro-irrigation systems and working capital for farming and livestock. San Juan Agroexport Company provides supplies, technical assistance, and export markets for ACODERT’s production.

The IAF has composed its partnership approach to work in harmony with the grassroots methodology it advanced over 25 years ago. Grassroots development acknowledges that the people closest to the problems of poverty can offer sound solutions, insights, as well as the drive to work themselves out of their circumstances. When local government and local businesses are brought into the equation, they bring facilities, management skills, technical expertise, and financial resources. Beyond the obvious material advantages of such collaborations, the non-material benefits of private and public sector contributions are invaluable.

The influence of a local mayor to overcome bureaucratic intransigence and channel government efforts to build a health clinic leaves more time for the other partners to implement a plan and adapt it to the community’s needs. The synergy that emerges when businesses and NGOs recognize that a mutually beneficial relationship can generate social improvement and profit is unique to the partnership solution and can encourage progress. Businesses discover that social investment can be a bridge for community relations, improve their rapport with the public sector, build mar-
ket recognition, and resolve issues that affect employee morale and productivity. Moreover, when government and local business invest in development they assume another role and become guarantors of community progress.

Sustainability is a goal that complements each IAF initiative, to ensure that the achievements made in a single project can continue, independent of external assistance. In IAF projects, partnerships are increasingly demonstrating the potential to create the internally driven momentum that makes a project sustainable.

Finally, communities bound together in partnerships are not only an outgrowth of democratization, but also a means of encouraging a virtuous cycle of strengthening the social contract and participatory practices among citizens.
Highlights from the various IAF offices in Fiscal Year 1998 illustrate the IAF’s contribution in Latin America and the Caribbean to promote the value of equitable, participatory, self-help development.

**Office of Programs**

In Fiscal Year 1998, the IAF awarded grants to organizations working to support: agriculture, enterprise development, education, research, community services, and ecodevelopment efforts. The grants in each of these areas employ social investment or local development strategies and build partnerships. Since 1971, the IAF has supported over 3,500 NGOs throughout Latin America and the Caribbean.

**When government and local business invest in development they assume another role and become guarantors of community progress.**

Agricultural projects are particularly well suited to the local development strategy. Moreover, rural populations are often the most disadvantaged for lack of access to social services and diverse economic opportunities. Therefore, in Fiscal Year 1998 the IAF focused 34 percent of its program resources on food production and agriculture projects. The primary project beneficiaries included small-scale farmers, livestock producers, and landless agricultural laborers. As an example, in Peru the IAF supports the Asociación ARARIWA para la Promoción Técnico-Cultural Andina to carry out a project in collaboration with four municipal development committees, farmers’ groups, and the International Potato Center. Together these partners will promote the application of integrated pest management techniques to increase incomes and food consumption for 600 families in isolated areas near Cusco. In Brazil the IAF supports a farmers’ cooperative, COOPIAVIVA, which works with 540 families and collaborates with five municipal governments to provide training and help farmers establish a means of processing and marketing their crops by expanding the farmers’ network. This not only increases access to markets, training, and technology, but also binds a community together through an investment in the common welfare.

Enterprise development, which represents 26 percent of the IAF’s program budget, works with small businesses and organizations. Projects in this area carry out activities such as training, technical assistance, and credit programs. In Mexico, through a foundation established by local entrepreneurs, Fundación del Empresariado Chihuahuense (FECHAC), the IAF is supporting the creation of 75 community banks throughout the northern state of Chihuahua. FECHAC provides small loans to support 750 micro-enterprises, and will mobilize $300,000 for additional loan capital. Working with women, youth, and the local indigenous population, this project brings together businesses and community organizations to reduce poverty.

Education and Training received 21 percent of the IAF Fiscal Year 1998 program budget. IAF projects in this area range from support for pre-schools to vocational schools for youths and adults. Through the Asociación para la Educación Básica (EDUCA), the IAF supports the establishment of 30 community-managed schools in three low-income districts in Santo Domingo, the capital city of the Dominican Republic. By working together with the parents, local business, the municipal government, and education authorities, EDUCA intends to benefit 1,500 children. In Panama, with an IAF grant, the Asociación Fe y Vida, is constructing a vocational training center to give lessons to local youth in welding, carpentry, refrigeration, and electronics. Working with 1,000 youths from the poorest neighborhoods of Panama City, the project will help place graduates in meaningful jobs.

**Office of External Affairs**

Through the Corporate Outreach Initiative, the Office of External Affairs has led the IAF’s efforts to establish co-financing partnerships with international corporations and thereby increase the amount of resources available for grassroots development. As a new program, and a major addition to the IAF’s Social Investment Strategy in Fiscal Year 1998, the Corporate Outreach Initiative met with considerable success. Several US-based corporations with subsidiaries or important markets in the Americas have invested resources to support grassroots and local development programs through various forms of collaboration with the IAF.

As we approach the twenty-first century, thriving corporations understand best that investing in development is beneficial. A new business ethic is flourishing that balances the interests of the investors, customers, employees, business partners, local communities, and the corporations themselves. Innovative companies realize that they gain better-informed business decisions, loyalty, enhanced corporate and brand reputation by making social investments. These contribute to long-term profitability and improved
conditions for a growing global society. The Office of External Affairs promotes this message and seeks out corporations that have already adopted these imperatives as their own.

In one venture Kimberly Clark, Corporativo Machado, a Mexican sugar company, and the IAF provided funding to the Fundación Comunitaria de Oaxaca, A.C. (FUNCOM), to promote collaboration among business, government, and community organizations, and to mobilize local resources for sustainable grass-roots development projects. In another alliance across the Atlantic, the IAF and the Prince of Wales Business Leaders Forum (PWBLF) formally agreed to collaborate on projects throughout Latin America and the Caribbean. The PWBLF is an international non-profit organization that promotes the practice of good corporate citizenship for the benefit of business and society. In July 1998, the PWBLF conducted a training program for IAF staff and representatives from Pact, Ashoka, Centro Mexicano para la Filantropía, the business association Perú 2021, and the Instituto Tecnológico y de Estudios Superiores de Monterrey on “How to Engage Business in Social Investment” and “How to Establish and Maintain Partnerships.” In Fiscal Year 1998 both the IAF and PWBLF collaborated to prepare a Spanish language training manual on partnerships.

In advancing corporate outreach the IAF works to showcase examples of productive alliances that build networks among partners. At the Business and Social Responsibility: the Americas Conference, the IAF presented examples of corporate responsibility by organizing a panel on “Business as a Partner in Social Development” with representatives from the PWBLF, Perú 2021, and the Fundación Corona from Colombia. The IAF co-sponsored a two-year “Encuentros Program” of North-South exchanges of experiences in partnerships for poverty reduction in conjunction with the MacArthur Foundation, Vesper Society, and Instituto Internacional de Medio Ambiente y Desarrollo, a network of urban Latin American NGOs, and the Economic Development Institute of the World Bank. The IAF also participated in the World Bank’s Business Partners for Development (BPD) initiative, a network of business, civil society, and government, whose objective is to produce solid evidence on the positive impact of cross-sector partnerships.

**Office of Learning and Dissemination**

With an array of projects to increase incomes, improve living conditions, better capabilities of communities to plan their future and instill habits of democracy—how does the IAF measure the actual impact of its grants? Through the Research and Evaluation Unit in the Office of Learning and Dissemination, the IAF examines grants to distill lessons learned and apply them in future projects and in the formulation of development strategies. Data collected from surveys, interviews, and on-site visits to the projects are organized in the Grassroots Development Framework (GDF). The GDF serves as a methodological guide of quantitative and qualitative information on IAF grants. In Fiscal Year 1998, the IAF identified core indicators that will be studied to track the progress of projects. In addition, several changes were introduced to the GDF and research practices to enhance data collection.

To prepare the next generation of leaders in development, the IAF has three fellowship programs for graduate students to support field research projects and career programs that promote innovative initiatives in social investment and local development. Since 1974, when the IAF announced its first fellowship competition, the IAF has supported the work of over 900 development specialists. In Fiscal Year 1998, the Fellowship Program approved 45 fellowships. The IAF awarded grants of $563,000, to which universities and fellows contributed over $455,000 in counterpart funds. Approximately 70 percent of the Fellowship grant budget was awarded to citizens of Latin America and the Caribbean.
The creative research that the IAF supports through its fellowships further documents the results and progress of partnerships. The career development that IAF fellowships support also expands the cadre of Latin American and Caribbean professionals who employ these developmental tools in their home countries. For example, one doctoral Fellow from Brazil, at Pennsylvania State University, is studying partnerships among indigenous communities, NGOs, and local and national government agencies that foster local fishery self-management in the Brazilian Amazon. In the Master’s field research program, a U.S. Fellow from the Massachusetts Institute of Technology is focusing on partnership models between small-scale farmer organizations and municipal governments to increase agricultural income by improving their access to local marketplaces managed by municipal governments in El Salvador. In the IAF U.S. Graduate Study Program for Latin American and Caribbean Citizens, a Fellow from Panama will complete a Master of Business Administration degree at the University of Notre Dame, and then will return home to promote partnerships among banks, corporations, and NGOs to support micro-credit programs to micro-entrepreneurs.

In Fiscal Year 1998, the IAF tailored its dissemination activities to complement the needs of the Corporate Outreach Initiative. One issue of the journal, *Grassroots Development* 21, no. 2 (1998), focused exclusively on social investment, and was distributed globally to over 27,000 readers. Several journal articles illustrated methods, mechanisms, and models that employed social investment in Latin America and the Caribbean. The Dissemination Unit also launched the IAF Website in English, Spanish, and Portuguese. With detailed explanations of the IAF development strategy and instructions on how to apply for a grant or a fellowship, the Website offers an economical and efficient means of communicating IAF information, casting a wider net to potential IAF grantees and fellows.

In the early 1970s the IAF pioneered the concept of fostering development at the grassroots level using participatory, self-help initiatives to help communities reduce poverty and improve their living conditions. Building on that original methodology of responsive and participatory development, the IAF today is supporting partnerships in social investment and local development throughout Latin America and the Caribbean.
Funds Available to the Foundation
The United States Congress annually appropriates funds for use by the Inter-American Foundation pursuant to the Foreign Assistance Act of 1961. The Foundation’s other funding source is the Social Progress Trust Fund administered by the Inter-American Development Bank. The Social Progress Trust Fund consists of the repayment of loans originally made by the U.S. government through the Alliance for Progress to various Latin American and Caribbean governments and institutions. The Foundation has access to the Fund pursuant to legislation enacted by the U.S. Congress in 1973.

Congressional Appropriations
Congressional appropriations are used for both program and administrative expenses. Congress appropriates money annually for a fiscal year that begins on October 1 and ends on September 30.

Social Progress Trust Fund
Social Progress Trust Fund resources are used for program expenses. The funds are available in the national currencies of 15 countries in which the Foundation supports projects; in each case, the currency is used only for the benefit of the country of origin. Funds are used to finance activities in agriculture, education and training, health, housing, land use, small business, and technical assistance. A new agreement for 1995-2000 funds was signed on August 10, 1995.

ARGENTINA

New Grants

Fundación Universidad Nacional de General Sarmiento (FUNAS), $250,300 over three years, to strengthen the capacity of local private and public institutions to participate in the design and implementation of public policies for local development. FUNAS will facilitate alliances among local government, community organizations and business, and develop innovative models of cooperation between organizations from the public and private sectors. (AR-320)

Federación Asociaciones Centros Educativos para la Producción Total (FACEPT), $300,000 over three years and six months, to strengthen 10 community rural schools by establishing a revolving loan fund for income-generating activities managed by parent, teacher, and student associations; provide training and technical assistance for income-generating activities; establish alliances with local businesses to mobilize resources for local development; and replicate the rural community school-model in other communities. (AR-321)

Colegio Mayor Universitario (CMU), $251,000 over three years, to build two health centers, two day-care units, two multipurpose community centers, and 140 low-income housing units in the poor communities of Santa Fe, Villa Oculta, and San Pantaleón. These centers will train 80 health promoters, provide day-care services for 750 children under four years of age, feed 600 children under 12 years of age, prepare 69 community leaders, and provide job training for 120 low-income people. (AR-325)

Asociación Civil NorteSur (NorteSur), $394,590 over three years, to install management information systems and train municipal employees in database management and research. This project will also provide basic services to at-risk populations in income-generation, literacy, and housing improvement. This project will benefit 180 municipal technicians, 1,100 poor families, and 80 civic organizations in the municipalities of Canuelas, Reconquista, Rivadavia, and San Francisco. (AR-327)

Subgrants Approved in FY98 by Established In-Country Funds

Fundación ARCOR, $240,000 over three years, to establish a development fund known as FEPIC to provide small grants to community organizations and non-governmental organizations (NGOs) located in the Province of Córdoba. These non-governmental organizations work on health and nutrition issues with disadvantaged youth, and offer vocational and/or technical training to young people. (AR-315) Obligated in FY97.

Fundación CLACYD (Córdoba, Lactancia, Alimentación, Crecimiento y Desarrollo)
$25,412
Health

Cooperación de Promoción y Consumo Concondur Ltda.
$21,080
Youth

Servicio de la Acción Popular
$25,638
Training

Fundación Juan Minetti, $294,200 over two years, to establish a cooperative development fund to be known by its Spanish name, Tendiendo Puentes. As the name implies, the fund will bridge the gap between the business sector and non-governmental civil society organizations to encourage private sector financing for local level projects aimed at poverty reduction. The fund will also attract the support of other corporations and foundations, includ-
Centro de Servicios Múltiples Educativos (CEMSE), $245,000 over three years, to carry out an educational reform program benefiting 8,000 low-income students from ten high schools in the city of La Paz. Through teacher and parent training, the creation of educational materials and curriculum changes, CEMSE will attempt to lower school drop-out and failure rates and raise academic performance, improve student health, and create greater involvement of local school boards and the municipal government in educational planning. (BO-462)

Programa de Coordinación en Salud Integral (PROCOSI), $392,531 over three years, to mobilize public and private sector resources in Bolivia and internationally. These resources will be used to establish a fund for food security and local development to support approximately 30 community-based and managed projects to improve the food security of 5,000 poor families, especially women and children, in 15 impoverished municipalities throughout Bolivia. (BO-463)

Grupo de Asesoramiento Multidisciplinario en Medio Ambiente y Agroecología (GAMMA), $199,635 over three years, to provide training and technical assistance and mobilize community and municipal resources to construct 300 watering holes and irrigate 384 hectares of pastureland for 380 Aymara herding families in the municipality of Choquecota. These activities will significantly augment the economic security of low-income herders who raise sheep and llamas in these remote communities. (BO-464)

Servicios Alternativos para la Producción (JATHA), $119,622 over two years, to mobilize $68,471 from beneficiaries and municipal sources to implement eight small-scale pasture and crop irrigation systems. This will enable 62 families in two altiplano communities to increase their dairy production, incomes, and collaborate with other dairy producers and a local private dairy plant to increase production for local markets. (BO-465)
Improve Productive Infrastructure

**Construcción de Vigiñas Lajma**
$5,577

**Construcción de Vigiñas Collpahuma**
$6,253

**Construcción de Vigiñas Toma Toma**
$5,070

**Subgrants Approved in FY98**

**Asociación Nacional Ecuuméica de Desarrollo (ANED)**, $82,310 for over one year, to establish a leasing fund for rural development. The project will also obtain an additional $200,000 in local funds to provide joint ANED-IAF financing and monitoring of 100 leases for agricultural machinery and technological improvements such as water pumps, motors, and storage facilities. These investments will improve agricultural production and enhance the marketing capabilities among peasant associations that have members with an average annual family income under $1,500. (BO-454) Obligated in FY96.

BRAZIL

New Grants
Centro de Assessoria e Estudos Urbanos (CIDADE), $197,985 over two years, for a local development program in the city of Porto Alegre to collaborate with the local government in development projects and provide training and technical assistance to community residents and government workers in the municipal budget process. CIDADE will also develop educational materials on these programs, including a Web site, to meet the demand for information from the public sector, both locally, nationally and internationally. (BR-762)

Federação de Órgãos para Assistência Social e Educacional (FASE), $202,350 over two years, for a local development program in three metropolitan areas to collaborate with municipal governments and provide training and technical assistance to community residents and government workers. Trainees will be instructed in the use of participatory mechanisms to resolve infrastructure and human service problems. (BR-763)

Cooperativa de Comercialização de Produtos Agro-industriais de Vila Valério (COOPAVIVA), $152,700 over two years, to execute a local development project to provide training and technical assistance to small-scale agricultural producers. COOPAVIVA will also establish a cooperative for processing and marketing fresh and processed fruit and other agricultural products in the state of Espírito Santo. The project will reach 540 producer families directly and affect hundreds more through a collaborative program with five municipal governments to improve production and marketing levels and increase income among local producers. (BR-770)

Supplemental Grants Over $10,000
Centro Ecológico (CE), $202,000 over two years, to continue a local development program providing training and technical assistance in organic production, processing and marketing to 1,500 small-scale farmers in Rio Grande do Sul, in collaboration with municipal governments. (BR-761-A2)

Drawn from several communities, these workers have united to build this agro-industry building project that will benefit their respective communities. An IAF funded project in concert with Cooperativa de Comercialización de Produtos Agro-industriais de Vila Valério (COOPAVIVA), in Espírito Santo, Brazil (BR-770). (Photo: Courtesy Sal da Terra)

A young artisan beneficiary of the Red Rural de Organizaciones Privadas de Desarrollo (Red Rural), which channels small amounts of financial resources to rural and urban groups to implement productive projects, such as this ceramics plant of the Asociación de Artesanos Aregueños, Areguá, Paraguay (PY-181). (Photo: Courtesy SEDES, Asunción, Paraguay)
Supplemental Grants Over $10,000

**Colectivo de Atención Primaria (COLECTIVO)**, $11,000, one year and six months, to continue its public health program to improve the capacity among poor municipalities and community organizations to better the quality of primary health care coverage. COLECTIVO will initiate program activities in the municipality of Colina, publish its newsletter Ecosalud and disseminate it to 3,000 readers.

(CH-501-A4)

**COLOMBIA**

**New Grants**

**Fundación Social (FS)**, $203,000 over two years, to establish and manage a self-sustaining credit program. This credit program will be incorporated into the formal financial market and will provide small-scale family businesses with access to bank credit benefiting approximately 815 low-income families in urban areas of Bogotá during the first two years. (CO-479)

**Consorcio Centro de Cooperación para el Desarrollo por Asociación de Participación (CDLP)**, $379,104 over four years, to carry out a conservation program in the Laguna Cocha lake region of Colombia. The project will improve natural resource management, increase production, increase family income through credit and eco-tourism initiatives, and build equitable alliances between rural communities and the Pasto municipal government, thereby enabling 3,000 local, low-income families to better satisfy their basic needs. (CO-488)

**Fundación Corona (CORONA)**, $67,000 over one year, to coordinate a competition to identify ten outstanding examples of partnerships among the private sector, public sector, and civil society. The models must be projects that contribute to reducing poverty in Colombia. These ten will then be examined as case studies to be published and disseminated within Colombia and throughout the hemisphere. (CO-489)

**Supplemental Grants Over $10,000**

**Fundación Antonio Restrepo Barco (FRB)**, $363,000 over three years, to provide additional assets to a joint IAF/FRB local development fund that will provide financing to 45 small-scale projects through grants and loans to community organizations serving approximately 900 low-income families. The projects will be designed to implement basic and preventative health measures, promote income-generation and job creation, and to support improved agricultural production and marketing techniques. The program will focus on populations in the Atlantic coast region of Colombia. (CO-476-A5)

**Subgrants Approved in FY98**

**Fundación Antonio Restrepo Barco (FRB)**, established a cooperative fund to provide grants to local groups for small-scale productive projects that will create employment, generate income, and promote sustainable development strategies, benefiting approximately 1,000 low-income people in the Atlantic coast region of Colombia. (CO-476)

**In-Country Funds**

**Asociación de Artesanos de San Andrés y Providencia**, $7,462.85, to purchase a vehicle for use with a three-year IAF-supported local development project of training and technical assistance on alternative agricultural production and marketing to low-income agricultural producers in the state of Espíritu Santo. The agroecological local development project will reach 450 producer families and 200 students through a collaborative pilot program with two municipal governments. The project will improve the farmers’ production levels and marketing through consultation to a state agricultural training school.

(BR-767-A1)

**CHILE**

**Supplemental Grants Over $10,000**

**Colectivo de Atención Primaria (COLECTIVO)**, $11,000, one year and six months, to continue its public health program to improve the capacity among poor municipalities and community organizations to better the quality of primary health care coverage. COLECTIVO will initiate program activities in the municipality of Colina, publish its newsletter Ecosalud and disseminate it to 3,000 readers.

(CH-501-A4)
Supplemental Grants Over $10,000

**COSTA RICA**

**New Grants**

 Centro Bonó (BONO), $168,000 over three years, to manage a small grant fund to support community-level training activities, increase the capacity of beneficiaries to articulate their needs, propose effective solutions, negotiate specific agreements and collaborations with other private and public entities, and manage financial and other resources. BONO will provide technical assistance and training to more than 2,000 leaders of 400 neighborhood organizations and six zonal federations in low-income areas of Santo Domingo. The project will contribute to measurable improvements in community access to education, health, and public security services. (DR-297)

 Consejo Municipal de Desarrollo de Esperanza, $111,988 over three years, to assist community organizations and the municipality of Esperanza to develop the technical and management skills, structures, inter-sectoral partnerships, and to mobilize funding. The objective is to implement urban infrastructure and service projects in transportation, water supply, solid waste management, health, education, and public security. The project’s primary beneficiaries are the low-income residents of Esperanza. (DR-299)

**DOMINICAN REPUBLIC**

**New Grants**

 Centro Zonal de Pastoral Social (CEZOPAS), $94,000 over two years, to be complemented by marketing and philanthropic resources from the Dominican private and public sectors, to raise the incomes of 420 small-scale farmers through the production and marketing of selected food crops utilizing sustainable agricultural practices. (DR-295)

 Centro de Educación para la Salud Integral (CESI), $94,200 over three years, to provide agricultural training and extension services to 300 small-scale farmers in ten mountain communities. The project will promote soil conservation, composting, and other sustainable agricultural practices. The Centro will channel credit from commercial sources to finance the purchase of inputs and labor to strengthen ten associations responsible for managing demonstration plots; maintain seedling nurseries; and assist with harvesting, storage, and marketing produce. (DR-296)

 Alianza de Organizaciones No Gubernamentales (ALIANZA), $96,000 over two years, to promote innovative community development partnerships between the private and non-profit agency communities and establish a business/non-governmental organization working group to increase philanthropy in the Dominican Republic. The group will establish a Center for Philanthropy and Social Investment, prepare a strategic plan for the promotion of philanthropy, and establish professional grantmaking guidelines to facilitate the mobilization of ten or more corporate grants to support community development for the poor. (DR-300)

 Asociación para la Educación Básica (EDUCA), $147,500 over three years, to establish 35 model community-managed pre-schools in three low-income districts of the capital region. These pre-schools will provide educational and day-care services to 1,500 children between three and six years of age and coordinate cooperative efforts among the parents, the local business community, the municipality, and educational authorities. (DR-303)

 Fundación Institucionalidad y Justicia (FINJUS), $61,000 over three years, to improve the quality of justice and legal services available to the poor. Reaching 350,000 households through a public education campaign, the project will directly influence 7,000 legal cases. FINJUS will instruct 500 community leaders, lawyers, and justice system employees in Santo Domingo, the Cibao region, and Barahona, in legislation, jurisprudence, and practice relating to citizen rights, rights of the accused and due process, victims' rights, consumers' rights, available administrative remedies, domestic violence, and protection of minors. This training will result in specific benefits to low-income individuals including a reduction in time spent in detention awaiting trial, protection of private and community property rights, physical safety against domestic violence, and improved access to public services. (DR-304)

 Asociación Campesina “El Limón en Lucha” (El Limón), $71,000 over three years, in partnership with the Community Council of El Limón, the Asociación para el Desarrollo de San José de Ocoa, and the EcoPartners Program of Cornell University, to establish a locally managed rural information technology center to create computer-based rural development training materials. The center will train 100 local residents in computer literacy, and instruct an estimated 100 rural leaders and rural development program personnel throughout the Dominican Republic in rural development projects. The center itself will directly generate five jobs and benefit computer-related, local small businesses. The center will also disseminate innovative, sustainable rural development methodologies country-wide in computer-based formats, such as CD-ROM. (DR-305)
Subgrants Approved in FY98
Associaión de Instituciones Rurales de Ahorro y Crédito (AIRAC), $300,000 over five years, to establish and administer a small loan and grant fund to assist a projected 25-30 small income-generating projects. Working with the rural and urban poor, the projects will focus on areas of sustainable agriculture, agroindustry, and small industry, to benefit 300 families. (DR-265) Obligated in FY94.

In-Country Funds

$8,000
Soil Conservation and Sustainable Agriculture
Asociación de Agricultores de los Dajíos
$10,343
Sustainable Agriculture and Microenterprise Development
Comité de Promoción “Progreso de los Pueblos”
$9,938
Training in Sustainable Agriculture and Preventive Health

ECUADOR

New Grants
Fundación Ecológica Ecuatoriana (FUDEC), $288,000 over three years, to establish a local development program to provide financial support and technical assistance to grassroots groups and non-governmental organizations that are building alliances with the public and/or private sectors to carry out their programs. The project will focus on environmental activities such as forestation and soil conservation, which protect natural resources and promote sustainable development among low-income populations. (EC-365)

Fundación Ecológica Ecuatoriana (FUDEC), $172,500 over three years, to promote the practice of social responsibility by providing training and technical assistance for the creation of 30 business social responsibility programs and local social responsibility committees in Quito, Guayaquil, and Cuenca. The project will maintain a seed capital fund for joint FEE-business sector support to local social and economic development initiatives; and, in partnership with leading businesses, non-governmental organizations, television and radio stations, newspapers, and national universities, carry out national media campaigns about social responsibility and incorporate the theme into the business curricula of Ecuadorian universities. (EC-367)

Subgrants Approved in FY98
Unión de Organizaciones Campesinas de Cotacachi (UNORCAC), $242,300 over three years, in collaboration with the municipality of Cotacachi, to promote citizen participation in local development in five rural indigenous and Afro-Ecuadorian communities. The project will provide legal assistance to 10 community organizations; benefit 180 individuals through a credit program; provide basic literacy instruction to 20 community promoters and 500 individuals; and promote organizational sustainability by establishing a textile microenterprise. (EC-368)

In-Country Funds
Comité de Desarrollo Local de Calderón
$6,962.77
Reforestation and Environmental Training

El Salvador

New Grants
Fundación Nacional para el Desarrollo (FUNDE), $298,900 over three years, to create local development strategies, programs, and projects with the municipalities of Soyapango and Nejapa, that will improve the quality of life of 300,000 inhabitants. (ES-175)

Corporación Departamental para el Desarrollo Integral de Morazán (CORDIM), $200,000 over two years, to provide its public and private sector members with the training and technical assistance needed to collaborate to address the state of Morazan’s socio-economic problems. The project aims to facilitate participatory state-level democracy,
improve organizational capabilities, develop project solutions to local problems, and access resources to implement local development projects. (ES-176)

**Corporación Departamental para el Desarrollo Integral de Chalatenango (CODDICH),** $180,500 over two years, to provide its public and private sector member organizations with technical assistance to produce local development projects to address local problems, identify resources to implement these projects, and facilitate a participatory democracy throughout Chalatenango. (ES-177)

**Centro Salvadoreño de Tecnología Apropiada (CESTA),** $280,940 over three years, to organize and carry out a sustainable waste management program in Suchitoto by addressing local ecological problems. The project will reduce pollution, generate income for the municipality and micro-entrepreneurs through garbage collection, support compost production, foster private sector cooperation in solid waste management, and improve the health of Suchitoto’s 8,000 inhabitants. (ES-178)

**Fundación Ignacio Ellacuría (FIE),** $232,825 over four years, to organize and implement technical assistance and credit programs to strengthen the capacity of three municipal governments and local development organizations in southern Morazán. The project will enable these entities to address the area’s health, education, production, marketing, infrastructure problems, and benefit Yamabal, Sensembra, and Guatajagua’s municipal governments and 15,000 of their 24,300 inhabitants. (ES-179)

**Patronato para el Desarrollo de las Comunidades de Morazán y San Miguel (PADECOMSM),** $290,425 over four years, to organize and implement training, technical assistance, and credit programs to increase the administrative and operational capacity of the municipal government and local development organizations in the municipality of Torola, Morazán. This project will make it possible for these organizations to coordinate their development efforts to address the area’s health, education, production, marketing, infrastructure and environmental problems, and benefit the majority of Torola’s 1,800 inhabitants. (ES-180)

**Asociación Coordinadora de Comunidades de Morazán y San Miguel (COMUS),** $253,100 over four years, to organize and implement training, technical assistance, and credit programs that strengthen community organizations and support financially sustainable and ecologically sensitive production and marketing activities in the communities of Piedra Luna, Guarumal, La Joya de Chilanga, Joya de los Cimientitos, and Piedra Parada, in the Microregión El Borroñoso. The project will benefit the area’s 11,000 inhabitants. (ES-181)

**Supplemental Grants Over $10,000**

**Sistema de Asesoría y Capacitación para el Desarrollo Local (SACDEL),** $78,070, to identify, through a competition, six outstanding examples of local development in El Salvador that feature significant private sector involvement, generate case studies, and disseminate this information within El Salvador and throughout the hemisphere. (ES-173-A2)

**Subgrants Approved in FY98**

**Grupos de Soporte a las Microempresas (GSM),** $171,000 over four years, to manage a regional fund that provides grants and loans not exceeding $30,000 to local development organizations. (ES-125) Obligated in FY93.

---

**GUATEMALA**

**New Grants**

**Instituto de Enseñanza para el Desarrollo (IEDAPES)**, $262,975 over two years, to help 20 communities in the municipality of Chisec consolidate their local development councils; develop inter-community and community-municipality alliances; and implement sustainable local development activities. This project will improve access to basic services, such as health care, education, potable water, and sanitation. (GT-246)

**Asociación de Comités de Desarrollo Rural Temalense (ACODERT)**, $111,000 over three years, to increase the income of ACODERT’s 69 low-income farm-family members, by providing small loans for the installation of micro-irrigation systems, and for working capital for agricultural and livestock production. The project will strengthen ACODERT’s partnership with the San Juan Agroexport Company, which will provide supplies, technical assistance, and export markets for ACODERT’s production. (GT-250)

**Equipo de Consultoría en Agricultura Orgánica (ECAO)**, $297,058 over three years, to establish sustainable development models, improve land-use practices, and increase farmer incomes in close collaboration with municipal governments in 18 communities in the states of Quetzaltenango and Sololá. ECAO will provide training to approximately 500 small-scale farmers and 15 development professionals in agroecological methods that increase and diversify production, while reducing the need for expensive and environmentally damaging chemical products. (GT-251)

**Asociación de Comités de Desarrollo Rural Rxiin Temalense (Rxiin)**, $207,000 over three years, to work in collaboration with the municipal governments and the Ministry of Health in San Juan La Laguna, and Santa Clara La Laguna. The project will improve the health of an estimated 3,676 women and children by managing and supporting local health clinics. One hundred volunteers will be trained in how to educate their communities in preventive health practices and nutrition, and how to form village health committees and pharmacies. (GT-252)
**HAITI**

**New Grants**

Organizasyon Peyizan pou Developman Edikatif Baro-Benè (OPDEB), $18,943 over two years, to promote training and technical assistance for small-scale farmers, establish a demonstration farm for agricultural production, and initiate a revolving seed distribution program for the provision of yam and bean seeds to 200 small-scale farmers. (HA-179)

Fondasyon Enstitisyon- yo pou Developman ki Sòti nan Baz-la (FIDEB), $143,480 over three years, to promote and support at least 60 local development partnerships through a program of education, training, and management of a small project fund. (HA-180)

Sendika Travayè Agrikol Savanèt (STAS), $95,025 over three years, for a program of civic, technical, and conflict resolution education and training, infrastructure improvement, and the construction of a multi-use civic center. In addition, this project will enable seed distribution and storage for at least 1,000 low-income families in nine communities and 19 communal sections in the lower Central Plateau. (HA-181)

Montman Peyizan Rankit (MPR), $50,683 over 30 months, to assist 120 artisans to improve craft production and incomes; help 800 farmers obtain pigs and improve animal husbandry techniques, and plant 50,000 tree seedlings annually to reestablish a local source of raw materials necessary for craft production. (HA-182)

Pwogram Fomasyon pou Organizasyon Dyakona (PWOFOD), $173,227 over three years, to assist residents of three low-income Port-au-Prince neighborhoods improve their social and economic condition through a program of resource mobilization for adult literacy, investment in six local development projects, and a program of microcredit for at least 100 entrepreneurs. (HA-184)

Fondation La Ruche (FLR), $255,940, over three years, to support social investment partnerships that will mobilize resources for investment in at least five local development projects involving at least 2,000 low-income families in southern Haiti. (HA-186)

**HONDURAS**

**New Grants**

Centro San Juan Bosco (CSJB), $253,514 over two years, to provide housing loans and oversee construction of small houses with 138 low-income families in the urban community of Ocotillo. CSJB will carry out the project through a formal agreement with the municipal government of San Pedro Sula, Honduras’ industrial capital. Loans will be repaid over 10 years and the loan fund will be used to build additional low-income housing around San Pedro Sula. (HO-226)

Red Nacional de Alfabetización de Honduras (RNAH), $340,000 over three years, to build and manage local libraries in 20 low-income communities throughout Honduras through the establishment of local development alliances with municipal governments, the private sector, and other community organizations. The libraries and associated educational programs will make sustainable improvements in literacy rates in each community, benefiting 800 low-income families. The libraries will also serve as centers for youth and adult education, community development planning, and project implementation. (HO-227)

Fundación Hondureña para la Protección y Conservación de Cayos Cochinos (FHCC), $303,000 over four years, to improve the social and ecological sustainability of the Cayos Cochinos Biological Reserve through community projects and training. This project will improve the living conditions of approximately 500 residents of the six communities that have traditionally lived and fished near the reserve: East End, Chachahuate, Bolanos, Rio Esteban, Nueva Armenia, and Sambo Creek. FHCC will also promote the participation of these communities in the management of the reserve’s marine resources. (HO-228)

In the immediate aftermath of the disaster NGOs like UNISA, used their organizational skills, knowledge of the community and their network of contacts, and formed the first relief response before international aid was organized. (Photo: Patrick Breslin)

---

**MEXICO**

**New Grants**

**Acción Ciudadana para la Educación, la Democracia y el Desarrollo, A.C.** (ACCEDDE), $294,575 over three years, to work in six municipalities of the state of Jalisco to strengthen the capacity of local groups and municipal authorities to jointly plan and mobilize resources. The project will promote collaboration designed to improve rural economic and social development. ACCEDDE will also provide credit and marketing services to 2,000 agricultural producers. (ME-407)

**Prodesarrollo: Finanzas y Microempresa,** $52,000 over one year, to carry out the Foro Regional de la Microempresa which will gather over 360 practitioners, business leaders, and public sector representatives to discuss the best methods for improving the effectiveness of financial and non-financial services for microenterprise development. (ME-408)

**Centro Campeñino para el Desarrollo Sustentable (CAMPESINO),** $129,900 over three years, to increase ecologically sustainable forms of production and improve water and sanitation systems in the state of Tlaxcala by training community promoters, developing municipal environmental plans, and channeling small loans to sustainable agricultural production projects. (ME-409)

**Federación Estatal de Sociedades de Solidaridad Social Cobanaras (FESSSC),** $169,059 over three years, to implement a microenterprise credit program that will create 114 small businesses, improve housing infrastructure, and participate in three government commissions, and benefit 3,688 families in 12 municipalities of the state of Sonora. (ME-413)

**Fundación Comunitaria de Oaxaca (FUNCOM),** $303,000 over three years, to create a matching grant fund to support grassroots community programs to improve the quality of life for Oaxacan people, including the supply of basic needs for over 720 low-income families. FUNCOM’s approach involves fostering inter-sectoral development through an active and committed participation among government, business, and local communities. (ME-415)
Fundación del Empresariado Chihuahuense (FECHAC), $271,041 over three years, to create 75 community banks throughout the state of Chihuahua. FECHAC will provide small loans to support 750 microenterprises, mobilize $300,000 in savings for additional loan capital, and provide training and technical assistance to microenterprise owners, community banks, and women borrowers. The project will benefit primarily children, youth, women, and indigenous populations. (ME-416)

Fundación Habitat y Vivienda (FUNHAVI), $300,000 over three years, to expand a revolving loan fund offering credit for critical housing improvements in Ciudad Juárez, Mexico, benefiting over 3,500 low-income families. FUNHAVI will implement collaborative recycling programs involving 11 U.S. maquiladora corporations. (ME-417)

Fundación Juan Diego (FJD), will receive $203,000 over three years, to establish 12 savings and loan institution branches in the low-income neighborhood of Delegación Iztapalapa, Mexico City, and will disburse over 14,000 loans to small-scale businesses benefiting over 49,500 individuals, increasing family income levels, and creating 1,200 new jobs. (ME-418)

Grupo K’nan Choch Nuestra Madre Tierra (GKC), $149,440 over three years, to implement a credit project for organic agricultural production, training, agricultural extension, and environmental conservation, to benefit 213 low-income families in the southern region of the state of Chiapas. (ME-419)

In-Country Funds
Instituto de Estudios para el Desarrollo Rural Maya, A.C. (Instituto Maya), $652,601, to continue administering a small project development fund for feasibility analysis, income-generating ventures, technical assistance and training, and exchange visits to similar ventures for rural and urban membership. (ME-337-A12) Obligated in FY90.

Subgrants Approved in FY98
Colectivo de Mujeres Indígenas de la Región Tlapanaeca
$5,300 Training

Sociedad de Solidaridad Social “El Pueblo”
$30,000 Agriculture and Microenterprise

Asociación Dana, A.C.
$8,760 Agriculture

Asociación de Piscicultores “Marinero”
$5,020 Eco-tourism

Sociedad Cooperativa de Consumo Regional “Chac Lol” S.L.
$6,010 Agriculture

Comisión de Solidaridad y Defensa de los Derechos Humanos
$11,280 Natural Resources

NICARAGUA

New Grants
Centro de Capacitación para el Desarrollo (CECADE), $227,500 over two years, to conduct and evaluate the pilot phase of a community leaders’ training program that will prepare grassroots leaders from communities throughout the municipality of Jinotega. Participants will learn how to manage local development projects through a series of classroom and on-site training exercises, prior to implementing the program in the other five Central American republics. (NC-221)
### PARAGUAY

#### In-Country Funds
Red Rural de Organizaciones Privadas de Desarrollo (Red Rural), $82,000 over one year, to establish an in-country fund called the Fondo de Solidaridad. The fund will channel small amounts of financial resources to rural and urban base groups to implement productive projects, and to implement activities related to training and institutional strengthening of national and regional member organizations. (PY-181) Obligated in FY96.

### PERU

#### New Grants
**Centro de Investigación, Educación y Desarrollo (CIED),** $193,200 over three years, will provide training, technical assistance, and credit to strengthen sustainable local development processes in the Tambo valley in the coastal region of Arequipa. This will be accomplished through increased collaboration among the different sectors, and mobilization of local credit and other financial resources from grassroots organizations, municipal governments, and businesses. (PU-466)

**Taller de Promoción Andina (TADEPA),** $257,250 over three years, together with the municipal government of Huamangilla and local communities, will carry out a rural development program benefiting 483 families with activities in soil conservation, improved watershed management, agricultural credit financing and training, and technical assistance in agriculture and livestock development in the Ayacucho region. (PU-470)

**Fundación para el Desarrollo Solidario (FUNDADES),** $228,502 over three years and six months, in collaboration with the municipal government of Huamangilla and local communities, will carry out a rural development program benefiting 483 families with activities in soil conservation, improved watershed management, agricultural credit financing and training, and technical assistance in agriculture and livestock development in the Ayacucho region. (PU-471)

**Centro de Información, Educación y Desarrollo (CIED),** $274,713 over two years and six months, in collaboration with four municipal districts, small-scale farmer groups, and the International Potato Center, to carry out a project in the Cusco region of Peru to increase the incomes and food consumption of 600 rural families through the application of integrated pest management technologies to their corn and potato crops. (PU-474)

**Asociación para el Desarrollo Rural de Cajamarca (ASPADERUC),** $143,248 over two years and six months, to establish 60 model integrated farms with peasant families using an integrated, diversified agroforestry system of production and natural resource conservation in the Condebamba valley in Cajamarca. ASPADERUC will disseminate improved technologies practiced on the model farms to 300 additional small-scale farmers in the Condebamba valley through training workshops and field visits. (PU-477)

### Supplemental Grants Over $10,000
**FINCA Perú,** $102,000 over eight months, to expand its micro-lending program in the city of Huancavelica to support small business activity and promote savings among 330 low-income women by organizing 10 additional village banks. (PU-458-A1)

### VENEZUELA

#### New Grants
**Universidad Nacional Experimental Simón Rodríguez (UNESR),** $198,459 over three years, as part of the agreement between IAF and Pequivén, a subsidiary of Petróleos de Venezuela, to improve education methodology and increase community involvement through the implementation of a local development project in 182 elementary schools in eight impoverished rural municipalities. This project will provide educational and community organization training to 1,242 teachers and 110 administration...
tors who, in turn, will work with 44,000 children between the ages of five and fourteen, and their parents.

Fundación Eugenio Mendoza (FEM), $203,000 over three years, to carry out an integrated microenterprise and credit program to increase employment and raise incomes while improving the quality of preschool educational services, benefiting over 1,500 micro-entrepreneurs and their families and 4,000 preschool children in the municipality of Cabimas, in the Venezuelan state of Zulia. (VZ-160)

Centro de Formación Popular Renaciendo Juntos (CEPOREJUN), $90,631 over four years, to carry out a program to strengthen local organizations, families, and 675 microenterprises in five communities in the state of Falcón, by providing technical assistance, training, credit, and on-site support. (VZ-161)

Fundación para la Capacitación Integral Angostura (Fundación Angostura), $146,606 over three years, in collaboration with Deltaven, a subsidiary of Petróleos de Venezuela, and the municipality of Heres to carry out a program in Ciudad Bolívar to provide specialized historical renovation training. The project will create employment opportunities for 120 low-income youths that have dropped out of the formal educational system, and generate additional income for the city and the surrounding areas. (VZ-162)

Fundación Proyecto Paria (FPP), $127,213 over three years, to provide training, technical assistance, and credit to 2,600 residents of seven rural communities, to carry out projects in education, health, and small enterprise development, and to increase income-generation, and access to basic community services. (VZ-163)

Centro de Educación y Promoción de la Autogestión Indígena (CEPAI), $81,555 over four years, to provide training and technical assistance to 10 microenterprises specializing in local agricultural production marketing. The center will establish and enhance microenterprise linkages with local government, strengthen community organizations, increase productivity and family income, and enhance the inter-cultural understanding of 7,500 indigenous people of five ethnic groups living in 36 river communities in Venezuela. (VZ-164)

Fundación para el Desarrollo de la Economía Popular (FUDEP), $197,232 over three years, to improve the income-generating capacity of 150 farmers and their families through the creation and establishment of business partnerships and a community bank, and by providing training and technical assistance for microenterprise development. (VZ-165)

Fundación para el Desarrollo Social (FUNDESOC), $90,679 over four years, to consolidate and expand its program of grassroots organization strengthening; administer revolving loan funds for microenterprise production, family housing improvement, and community stores; establish and expand community health centers and pharmacies; and provide training and technical assistance. The project will benefit approximately 1,500 low-income families, or 7,500 persons in eight communities in the state of Mérida. (VZ-166)
Central Cooperativa del Estado Portuguesa (CECOPORT), $107,365 over four years, to promote school attendance and nutrition programs benefiting over 60,000 schoolchildren. Additionally, the project will increase crop diversification for 100 small-scale farmers and improve access to agricultural markets for 25 rural communities. CECOPORT will also instruct 1,600 mothers in hygiene, food preparation, and storage. (VZ-167)

Federación de Centros Culturales del Estado de Nueva Esparta (FEDENE), $136,645 over three years, to promote local cultural and economic development among low-income populations of the state of Nueva Esparta. FEDENE will provide training and technical assistance in tourism development to 20 cultural centers, 800 artisans, and three municipal governments. The project will assist 60 microenterprises with business development, production and marketing, and will educate 120 children in cultural expression. (VZ-169)

Supplemental Grants Over $10,000

Centro de Reflexión y Planificación Educativa (CERPE) and Centro al Servicio de la Acción Popular (CESAP), $202,827 over three years, to carry out a local development program that will strengthen community organization capacity to plan and manage self-help development projects in small business management and institutional development. The project will also improve the quality of basic education in local schools, and establish a cadre of local small-scale business specialists to provide technical assistance and training to small businesses in the municipality of Páez. (VZ-138-A1)
The Office of External Affairs manages the Inter-American Foundation’s Corporate Outreach Initiative. This program seeks to bring major corporations, and especially US corporations, into partnership with the IAF to share in funding sustainable, local, and grassroots development projects in Latin America and the Caribbean. The goal of the program is to broaden the support base for development projects by encouraging US corporations to play a more active role in reaching out to poor communities in the countries in which they operate. The Corporate Outreach Initiative is carried out in close coordination with the IAF’s Office of Programs, which for several years has carried out similar work with Latin American companies.

As a new program for Fiscal Year 1998, the Corporate Outreach Initiative has achieved considerable success. Several US-based corporations with subsidiaries or important markets in the Americas have invested resources to support grassroots and local development programs through various forms of collaboration with the IAF, which are illustrated on page 31.

**Collaboration with the Prince of Wales Business Leaders Forum**

The Office of External Affairs has expanded its collaborative activities with the Prince of Wales Business Leaders Forum (PWBLF). The PWBLF is an international non-profit organization that promotes the practice of good corporate citizenship and sustainable development as a natural part of successful business operations. Under the terms of a memorandum of understanding signed by the IAF and the PWBLF in December 1997, the IAF and the PWBLF have continued their collaboration. Activities such as the development of partnerships through training and technical assistance, results measurement, dissemination of good practices in corporate social investment, and the identification of corporate partners that may be interested in co-financing arrangements with the IAF to support grassroots development programs. In Fiscal Year 1998, the IAF and the PWBLF began working together on the following projects:

- In July 1998, the PWBLF conducted a training program for IAF staff and representatives from Pact, Ashoka, Centro Mexicano para la Filantropia, Peru 2021, and the Monterrey Technological Institute on “How to Engage Business in Social Investment” and “How to Establish and Maintain Partnerships” using PWBLF’s methodology of INSIGHT exchanges and training.
- The PWBLF has contributed the lead article, “Business as Partners in Development: Building the Public Contribution of Private Enterprise,” in the IAF’s Social Investment issue of *Grassroots Development* 21, no. 2 (1998).

INSIGHT Workshop participants visit a day care center maintained by TRW Corporation. With the help of the state government, TRW built this child-care facility for its workers’ children, staffed with trained nurses. A good example of responsible business and partnerships at work, the visit highlighted the INSIGHT message to workshop participants. (Photo: Enrique Ramos)
Partnership Services and Institutional Collaboration

At the Business and Social Responsibility: the Americas Conference, the IAF facilitated a panel on “Business as a Partner in Social Development” with representatives from the PWBLF, Peru 2021 (IAF Grant PU-455), and the Fundación Corona (IAF Grant CO-477) presenting examples of their corporate responsibility programs. Over 200 representatives of US, multinational, and Latin American businesses attended the event.

The IAF co-sponsored a two-year “Encuentros Program” of North-South exchanges of experiences in partnerships for poverty reduction. These exchanges were carried out in conjunction with the MacArthur Foundation, Vesper Society, and Instituto Internacional de Medio Ambiente y Desarrollo (IAF Grant LA-153), a network of urban Latin American NGOs, and the Economic Development Institute of the World Bank. In Fiscal Year 1998, a workshop was also held in El Salvador for Central American business leaders on the role of the private sector in sustainable development.

The IAF is participating in the World Bank’s Business Partners for Development (BPD) initiative. BPD is a network of businesses, civil society, and the public sector, whose objective is to produce evidence on the positive impact of cross-sectoral partnerships. Because of its successful experience collaborating with oil and mining companies, the IAF is also participating in the Natural Resources Cluster Group, which is co-chaired by CARE and BP Amoco Corporation.

Preview of Upcoming Initiatives

Brazilian affiliates of International Business Machines (IBM) and Xerox Corporation are negotiating the possibility of a partnership with the IAF and the Fundação Acesita para o Desenvolvimento Social, a Brazilian corporate grant-making foundation. This collaboration would work to expand a food processing business in a low-income community, design and implement a volunteer program, and train local NGOs in administration and fundraising techniques in the state of Minas Gerais.

The IAF and the American Chamber of Commerce in São Paulo are negotiating an agreement that would establish a joint program to promote corporate responsibility and social investment among the Chamber’s 2,500 members.

Additionally, External Affairs staff have met with a coalition of 50 US and Brazilian businesses to discuss an initiative to revitalize the downtown sector of São Paulo. On another front, discussions have been initiated with Xerox Corporation and General Motors about possibilities for co-funding grassroots development projects.

In Mexico, IAF staff have met with representatives of 12 US and multinational corporations to explore avenues of collaboration. Opportunities with Green Giant and 3M are surfacing. Other discussions are focusing on possibilities for co-funding small-scale economic development projects with the Fundación J. P. Morgan in Mexico City.

In Peru, External Affairs staff met with representatives of 17 US firms with operations in Peru, and also with the Social Development Committee of the Peruvian National Mining and Petroleum Society. In addition to the IAF’s partnership with the Antamina Mining Company, possibilities for collaboration are being explored with a newly formed consortium of mining companies in Peru.

In El Salvador, External Affairs staff are currently in discussions with representatives of Exxon and Texaco about possibilities for co-funding environmental, health, and education projects in that country.

Discussions were recently initiated between the IAF and the American Chamber of Commerce in Honduras to explore ways for US companies and the IAF to work together to help re-establish microenterprises destroyed by Hurricane Mitch.

Other social investment initiatives and discussions are underway with SmithKline Beecham, Johnson & Johnson, the Gap, and Cummins Diesel.
IAF Corporate Outreach Initiative for FY98

The IAF has been awarded a grant of $30,000 from the Levi-Strauss Foundation to be used to support grassroots development projects in northern Mexico.

The AES Corporation (AES), a global power company, has signed an umbrella agreement with the IAF to identify opportunities for the IAF to work with AES owned companies in the Mexico, Central America, and Caribbean region (see box).

The AMOCO Corporation and the IAF signed a memorandum of understanding to co-fund grassroots development activities in Venezuela. Over a three-year period, the IAF will invest $1.05 million and AMOCO will invest $2.1 million to support this effort. AMOCO will also share the costs of the Foundation’s in-country support contractor (ICS) in Venezuela. Both entities are currently co-funding a Venezuelan foundation to provide training and technical assistance in health, basic education, and income generation opportunities to indigenous communities in the Orinoco Delta (IAF Grant VZ-168).

The Compañía Minera Antamina S.A. (Antamina) and the IAF are exploring ways of jointly identifying and financing development projects in the Ancash region of Peru in the amount of $3 million over a period of three years. Antamina is a Peruvian company created and wholly owned by a consortium of three Canadian mining companies—Noranda, Inc., Rio Algom, Ltd., and Teck Corp.—with extensive mining operations already in South America, as well as in North America, Central America, the Caribbean, Europe, Africa, and Asia. Antamina’s copper and zinc mining operations are expected to increase Peru’s total mining exports by 25 percent by the year 2002.

In collaboration with the municipal government of Nejapa, the IAF, Coca-Cola, and Coastal Technologies of Texas are co-financing a small projects fund, created by the Fundación Salvadoreña de Apoyo Integral, that supports local development activities in El Salvador (IAF Grant ES-174).

The IAF and the Fundación Inti Raymi are co-financing a local development fund that finances small-scale economic development projects in rural Bolivia (IAF Grant BO-461). Inti Raymi is owned by the Battle Mountain Gold Company of Texas.

The IAF, together with the Consorcio Interinstitucional para el Desarrollo Regional (a consortium of eight Peruvian NGOs), the municipal government of Cajamarca, and the gold mining company Minera Yanacocha, S.A. are co-financing a local credit fund. Minera Yanacocha is a subsidiary of the Newmont Gold Company of Colorado. The credit fund gives loans (and occasional donations) to small-scale farmers and cattlemen, artisans, and other micro-entrepreneurs to improve their operations and production. The fund also enables impoverished communities to improve their infrastructure (IAF Grant PU-461).
The IAF, the Inter-American Development Bank (IDB), the Corporación Andina de Fomento, the Ford Foundation, and Citibank provided funding for the Latin American Regional Micro-Credit conference held in Mexico, as a follow-up activity to the Micro-Credit Summit of January 1997 (IAF Grant ME-408).

Kimberly Clark, Corporate Machado, a Mexican sugar company, and the IAF provided funding to the Fundación Comunitaria de Oaxaca, A.C. (FUNCOM) to promote collaboration among business, government, and community organizations, and to mobilize local resources for sustainable grassroots development projects. The FUNCOM grant will establish a local development fund to support small-scale economic development projects carried out by local community organizations (IAF Grant ME-415). Citibank is also providing support to FUNCOM for other program activities.

**A Powerful Alliance**

Throughout 1998, the Office of External Affairs met with executives from the AES Corporation (AES), a global power company with headquarters in Arlington, Virginia, to present social investment options available with the Inter-American Foundation. In January 1999, the IAF and AES signed a memorandum of understanding (MOU) wherein the parties agreed to identify opportunities for collaboration in the Mexico, Central American and Caribbean Region.

The AES Corporation is the world’s largest private power company with revenues for the first half of 1998 of $1.5 billion, up 118% from the previous year. The corporation is expanding rapidly in Latin America and the Caribbean and has purchased companies in Mexico, El Salvador, Panama, the Dominican Republic, Puerto Rico, Brazil, and Argentina. AES is considered among the premier U.S. corporations dedicated to the promotion of progressive corporate social responsibility worldwide.

Under the terms of the umbrella agreement signed with AES, the IAF will seek to forge alliances with AES-owned companies in the Mexico, Central America and Caribbean Region to establish sustainable, country-based programs to support self-help development efforts. The Compañía de Luz Eléctrica de Santa Ana (CLESA) in El Salvador is the first AES affiliate company to sign a working agreement with the IAF under the terms of the umbrella agreement.

CLESA is a majority-owned subsidiary of AES and Energía Global, a Boston-based developer of power projects. The IAF/CLESA agreement, signed in January 1999, commits the IAF and CLESA to work together to identify and support community initiatives throughout El Salvador and foster greater participation of municipal governments and other private companies in local development activities. This project will work in conjunction with a CLESA program to extend electrical service to poor, isolated communities. As CLESA brings electrical power to these low-income communities, it will work with the IAF to insure that partial funding is made available to support community development efforts. Recipients of IAF/CLESA funding will be non-governmental organizations engaged in sustainable development initiatives designed to improve the living standards and quality of life for low-income people through self-help efforts. The IAF/CLESA program will respond to written funding requests submitted to it by non-governmental organizations, and both IAF and CLESA staff will engage in the review of these proposals. Both entities will also share responsibility for project monitoring as well as for learning and for dissemination of project outcomes to a broader audience.

Sarah Slusser, president, AES Aurora, and George A. Evans, president of the Inter-American Foundation, earlier this year sign a Memorandum of Understanding at the IAF in Arlington, Virginia.
Fellowship Programs

IAF Fellows as Partners in Development
As a result of the 25th annual fellowship competitions in 1998, the Inter-American Foundation awarded grants to 26 U.S. universities in 16 U.S. states, providing over $563,000 in fellowships. The following is a listing of the 45 IAF Fellows from these universities in all three IAF fellowship programs.

IAF U.S. Graduate Study Fellowship Program for Latin American and Caribbean Citizens
Fellows with their home countries, degree programs, disciplines, U.S. universities, and career linkages to IAF program priorities:

Enrique Cadena (Colombia), Master of Business Administration, Wharton School of Business, University of Pennsylvania: Promote partnerships among the private sector and NGOs to support economic development within low-income communities in the Department of Santander del Sur in Colombia.

Katia Carvalheiro (Brazil), M.A., Latin American Studies, Center for Latin American Studies, University of Florida: Promote collaboration among small-scale farmers, NGOs, and governmental agencies (at local and national levels) to foster small-scale agriculture, sustainable participatory development, and natural resource management in the state of Pará in the eastern Brasilian Amazon.

Vivian Dutari (Panama), Master of Business Administration, University of Notre Dame: Promote partnerships among banks, corporations and NGOs to expand micro-credit to micro-entrepreneurs in Panama.

Alvaro J. Herrero (Argentina), M.A., Latin American Studies, Center for Latin American Studies, Georgetown University: Promote collaboration and problem-solving among neighborhoods, NGOs, municipal governments, and the private sector to foster development in the city of La Plata, Argentina.

Priscila Izar (Brazil), M.A., International Development Policy, Sanford Institute of Public Policy, Duke University: Develop basic community improvements within low-income neighborhoods through collaborative planning processes among communities, NGOs, and municipal government agencies in Brazil.

Lêda Martins (Brazil), Ph.D., Anthropology, Cornell University: Promote partnerships among indigenous communities, NGOs, and local and national government agencies to foster grassroots development within indigenous communities in the Brazilian Amazon.

Cristina F. Massardo (Chile), Sponsored Research, Ecology, University of Connecticut: Promote collaboration among poor communities, local schools, municipal governments, and national governmental agencies to foster improved health conditions within poor communities that rely on medicinal and edible plants in Chile.

Diego A. Molano (Colombia), M.A., Public Administration, School of Public and International Affairs, Columbia University: Promote private-public partnerships by expanding participation,

In the Ancash region of Peru María Marillo takes notes at an agricultural workshop sponsored by Centro de Información y Desarrollo Integral de Auto Gestión (CIDIGA) to teach farmers techniques to improve crop production (PU-473). (Photo: Courtesy SASE, Lima, Peru)
training young grassroots city leaders, and fostering innovative urban development plans to support diverse community improvement programs for low-income communities in Bogota, Colombia.

Gonzalo Mosquera (Colombia), M.A., College of Architecture, University of Arizona: Promote affordable housing for marginalized communities through collaboration among communities, NGOs, and local government programs in Bogota, Colombia.

Gustavo Pedraza (Bolivia), M.A., Public Policy and Management, Harvard University: Foster alliances among indigenous communities, NGOs, municipal governments, national government agencies, and the private sector to promote agricultural production, income generation, and natural resource management among indigenous communities in Bolivia.

Valeria I. Procupez (Argentina), M.A., Anthropology, The New School for Social Research: Promoting collaboration among community organizations, NGOs, municipal government agencies, and the private sector to foster housing and urban development within low-income neighborhoods in Buenos Aires, Argentina.

Ricardo Rozzi (Chile), Ph.D., Ecology, University of Connecticut: Promote collaboration among indigenous communities, local schools, NGOs, municipal governments, and other public institutions to foster indigenous livelihoods and natural resource management in Chile.

Elsa Astrid Ulloa (Colombia), Ph.D., Anthropology, University of California at Irvine: Promote alliances among indigenous community members, their organizations, NGOs, private foundations, and public institutions (at the local and national levels) to foster natural resource management in the Pacific region of Colombia.

Review Committee Members:

Ronald P. Arms (U.S.A.), Program Director for Central America, the Dominican Republic, and the Southern Cone, Inter-American Foundation.

Harvey F. Kline (U.S.A.), Ph.D., Director of the Latin American Studies Program, and Professor of Political Science, University of Alabama, Tuscaloosa.

María Elena Morín G. (Mexico), Ph.D., Directora, Centro de Apoyo al Desarrollo Sostenible, Instituto Tecnológico y de Estudios Superiores de Monterrey (ITESM), Campus Monterrey, Monterrey, Nuevo León, Mexico.

For information on fellowships visit the IAF homepage on the World Wide Web at: http://www.iaf.gov

IAF Field Research Fellowship Program at the Doctoral Level

Fellows with their home countries, disciplines, U.S. universities, and dissertation field research projects’ linkages to IAF program priorities:

Gianpaolo Baiocchi (Brazil), Sociology, University of Wisconsin: Strengthening citizen participation in determining budget priorities of the municipal government to improve basic community services in low-income neighborhoods in Porto Alegre, Brazil.

Lesley D. Bartlett (U.S.A.), Anthropology, University of North Carolina at Chapel Hill: Strengthening partnerships among NGOs and municipal governments to promote adult literacy in Paraíba, Brazil.

Daniel E. Beams (U.S.A.), Anthropology, University of Kentucky: Promoting collaboration among base groups, community organizations, NGOs, and the government programs of the municipality of Cajamarca in Perú to implement basic community improvement projects.

Adam J. Behrendt (U.S.A.), Development Program, College of Agricultural and Life Sciences, University of Wisconsin: New roles for NGOs and municipal governments in Bolivia and their new forms of collaboration.

Shawn Bird (U.S.A.), Political Science, University of Florida: Promoting the role of municipal assemblies in fostering collaboration among communities and municipal governments to improve basic community services in two rural departments in El Salvador.

Anne Browning (U.S.A.), Anthropology, University of Arizona: Fostering collaboration among communities, NGOs, mining companies, municipal governments, and state government agencies to promote mineral resource management and improve environmental health conditions in the state of Sonora in Mexico.

Anne M. Choup (U.S.A.), Political Science, University of North Carolina at Chapel Hill: Building coordination among neighborhood organizations, NGOs, and municipal governments to improve basic community services in Jayaco (a small rural town in the province of Monseñor Noulé) and in a low-income barrio of Santo Domingo in the Dominican Republic.

Monica DeHart de Galicia (U.S.A.), Anthropology, Stanford University: Role of culture in promoting partnerships among indigenous communities, indigenous NGOs, and indigenous municipal governments in the rural Department of Totonicapán in Guatemala.

Carla M. Guerron (Ecuador), Anthropology, University of Oregon: Developing alliances among local Afro-Latin American communities, NGOs, municipal governments, other public institutions, and investors to promote eco-tourism strategies that foster sustainable development for low-income populations and natural resource management in Northwestern Panama.

Eric G. Holt (U.S.A.), Environmental Studies, University of California at Santa Cruz: Fostering collaboration among farmer-to-farmer organizations, private companies, municipal governments, and local offices of other public institutions to promote agricultural and environmental sustainability on the Isla de Ometepe in Nicaragua.
Tomás Huanca (Bolivia), Anthropology, University of Florida: Fostering partnerships among indigenous communities, municipal governments, and the local offices of the national park agency to promote environmentally sound agriculture and natural resource management in the “Territorio Indígena del Parque Nacional, Isiboro-Secure” (TIPNIS) in Bolivia.

Jennifer L. Johnson (U.S.A.), Sociology, University of Chicago: Impact of international development assistance on encouraging partnerships among grassroots membership organizations, municipal governments, and other public institutions to promote small-scale rural enterprises, basic community services, and natural resource management in the state of Guerrero, Mexico.

Lise K. Nelson (U.S.A.), Geography, University of Washington: Building and strengthening collaboration among indigenous communities, municipal governments, and local offices of federal agencies to promote reforestation in Michoacan, Mexico.

Henrique Pereira (Brazil), Ecology, Pennsylvania State University: Building partnerships among subsistence fishing communities, local NGOs, municipal governments, and other public institutions to promote local fishery self-management, nutritional subsistence within local disadvantaged communities, and fishery resource conservation in the Manaus region of the Brazilian Amazon.

Luciana Porter (Mexico), Forestry, School of Forest Resources and Conservation, University of Florida: Promoting the local decision-making authority of the community assembly within the Mexican ejido to promote small-scale rural enterprise and natural resource management within the Calakmul Biosphere Reserve in the state of Campeche in Mexico.

Diane L. Ruonavaara (U.S.A.), Resource Development, College of Agricultural and Natural Resources, Michigan State University: Strengthening the roles of citizen participation and community organizations in collaboration with municipal governments, other public institutions, and corporations to promote sustainable small-scale rural enterprises and natural resource management within ejido boundaries in the state of Oaxaca, Mexico.

Amanda L. Stronza (U.S.A.), Anthropology, University of Florida: The impacts of ecotourism partnerships between private companies and local indigenous communities on sustainable enterprise development, living conditions of indigenous people, and natural resource management in the department of Madre de Dios in the Peruvian Amazon.

L. Harlan Davis (U.S.A.), Ph.D., Associate Vice President, and Director of the Office of International Development, and Professor of Agricultural and Applied Economics, University of Georgia, Athens.

IAF Field Research Fellowship Program at the Master's Level Fellows with their home countries, disciplines, U.S. universities, and Master's-level field research projects’ linkages to IAF program priorities:

Ariane C. de Bremond (U.S.A.), Environmental Studies, University of California at Santa Cruz: Building sustainable partnerships among community organizations, local private-public development councils, and municipal governments to promote environmentally sound development planning in Guatemala.

Timothy G. Fogarty (U.S.A.), Anthropology, University of Florida: Models for local collaboration among community organizations, NGOs and municipal governments to mobilize resources from foreign NGOs in developed countries to strengthen local participatory, integrated, sustainable rural development in Nicaragua.

Ian P. Lipsky (U.S.A.), Agricultural and Biological Engineering, College of Agriculture and Life Sciences, Cornell University: Collaboration among communities, NGOs, and governments to expand irrigation systems and increase small-scale farmer production and income in the department of Cochabamba, Bolivia.

Mark A. Mittelhauser (U.S.A.), International Development Program, American University: Private-NGO-municipal partnerships to promote job creation and microenterprise development in Rio de Janeiro, Brazil—an analysis of the recent citizens’ campaign against hunger.

Franco A. Montalto (U.S.A.), Agricultural and Biological Engineering, College of Agriculture and Life Sciences, Cornell University: Community-NGO-government collaboration to promote community-based, sustainable wastewater treatment in small neighborhoods and improve local health conditions in the city of Masaya in Nicaragua.

Daniel J. Moss (U.S.A.), City Planning, International Development and Regional Planning, Department of Urban Studies and Planning, Massachusetts Institute of Technology: Partnership models among small-scale farmer associations and municipal governments to increase small-scale farmer agricultural production and income by widening small-scale farmer access to local marketplaces controlled by municipal governments in El Salvador.

Sarah M. Otterstrom (U.S.A.), Ecology, Department of Environmental Science and Policy, University of California at Davis: Building local cooperation among communities and government programs to promote rural community-based planning to ameliorate the negative effects of severe environmental conditions (including the “El Niño” climate system) on community health, agricultural production, and environmental management in rural communities in the province of Guanacaste, Costa Rica.

Ricardo Rozzi (Chile), *Ecology and Evolutionary Biology, University of Connecticut*: Strategies for fostering collaboration among Huilliche indigenous communities, local NGOs, municipal governments, and local park officials to promote indigenous livelihoods and forestry management in the Chiloe National Park in southern Chile.

Pilar M. Valenzuela (Peru), *Linguistics, University of Oregon*: Supporting local NGO-government collaboration to design programs and school materials on bilingual education for primary and secondary students who speak Shipibo-Conibo and improve local public schools in the Peruvian Amazon.

Mariana Varese (Peru), *Tropical Conservation and Development, Center for Latin American Studies, University of Florida*: Strategies for increasing collaboration among communities, NGOs, and local government to provide incentives for small-scale landholders to expand ecologically sound agricultural production and improve natural resource management in the southern Peruvian Amazon.

Patrice A. Wagonhurst (U.S.A.), (dual Master’s degrees) *Community Health Sciences, School of Public Health; and Latin American Studies, Latin American Center, University of California at Los Angeles*: Supporting collaboration among communities, NGOs, and local government to provide incentives for small-scale landholders to expand the participation of rural Quechua women in health program evaluations and to improve local health services in indigenous communities in Bolivia.

Stefanie D. Wickstrom (U.S.A.), *Political Science, University of Oregon*: Promoting local collaboration among indigenous communities and government agencies to foster local natural resource management in rural Panama.

**Review Committee Members:**

Antoinette Brown, Ph.D. (U.S.A.): *Research and Evaluation Officer, Office of Learning and Dissemination, Inter-American Foundation*.

Philip Young, Ph.D. (U.S.A.): *Professor (and former Chair), Department of Anthropology; and former Director, International Studies Program, University of Oregon, Eugene*.

For information on fellowships visit the IAF homepage on the World Wide Web at: http://www.iaf.gov

**U.S. Universities as IAF Partners**

All U.S. universities are eligible to receive IAF grants to support IAF Fellows associated with their respective universities. The following 26 U.S. universities received IAF grants in FY 1998:

- American University • Columbia University • Cornell University
- Duke University • Georgetown University • Harvard University
- Massachusetts Institute of Technology • Michigan State University
- New School for Social Research • Pennsylvania State University
- Stanford University • University of Arizona • University of California at Davis • University of California at Irvine
- University of California at Los Angeles • University of California at Santa Cruz
- University of Chicago • University of Connecticut • University of Florida • University of Kentucky
- University of North Carolina at Chapel Hill • University of Notre Dame • University of Oregon
- University of Pennsylvania • University of Washington
- University of Wisconsin at Madison

**A Call for U.S. Faculty Members • Volunteers Invited •**

Tenured faculty members (must be U.S. citizen) are invited to serve on a volunteer basis as Members of Review Committees in all three IAF Fellowship Programs. If you are interested, please contact the IAF Fellowship Office. For more information and our address, please visit the fellowship section of the IAF homepage on the World Wide Web: http://www.iaf.gov
Dissemination

Publications by the Inter-American Foundation

Formación de alianzas para el desarrollo sustentable (Prince of Wales Business Leaders Forum, Inter-American Foundation and Kvaerner de México 1999), offers guidelines to practitioners interested in forming partnerships. The chapters, arranged in the sequence of a partnership building process, start with the planning stages, take the reader through the construction of a partnership, and then end with techniques for measuring the impact of partnership activities. Examples of actual working partnerships throughout Latin America and the Caribbean are included (available only in Spanish).

Social Capital, Sustainability and Working Democracy—New Yardsticks for Grassroots Development, Marion Ritchey-Vance, (IAF 1998), is a monograph that explains the Grassroots Development Framework (GDF), which is the IAF’s tool for measuring the results of development projects. The article reports on pilot testing, giving samples of the GDF applied to IAF projects. The Spanish version is: El capital social, la sostenibilidad y la democracia en acción: Nuevas medidas para evaluación del desarrollo de base.

The Second Inter-American Conference of Mayors, IAF/Organization of American States, Consultation on Local Development (April 16, 1996), is a collection of the conference papers in Spanish and English that address the concept of local development, a discussion that laid the groundwork for the IAF’s local development strategy.

Gender and Urban Social Movements: Women’s Community Responses to Restructuring and Urban Poverty, Amy Lind and Martha Farmelo, (United Nations Research Institute for Social Development UNRISD 1996), is a collective analysis by the IAF, UNRISD, and the United Nations Volunteers of the gender aspects of women’s community action and local governance based on a pool of case studies from the three institutions. The Spanish version is: Movimientos sociales urbanos y género: Respuestas de las comunidades de mujeres a la reestructuración y a la pobreza urbana.

Inter-American Foundation Case Studies in Grassroots Development: A Classroom Reader and Teacher’s Notes (1995), provides nine case studies of IAF-funded projects that address start-up, expansion, consolidation, and close-out phases of NGO development and other issues facing NGO’s in all stages of growth. The Teacher’s Notes complement the text by suggesting directions for classroom discussion and possible teaching plans.

A Guide to NGO Directories, 2nd ed. (IAF 1995), offers a listing of NGO directories of 17 Latin American countries and the Caribbean listed by name, publisher, address, telephone and fax numbers, and a brief description of the directory. Spanish version: Guía de directórios de ONG (IAF 1995).

Cultural Expression and Grassroots Development: Cases from Latin America and the Caribbean, Carmelo MesaLago, (IAF 1992), is an analysis of health-care policy in Latin America and the Caribbean region, with an emphasis on creative, grassroots approaches. Spanish version: Atención de Salud para los Pobres en la América Latina y el Caribe (1993).

Intermediary NGOs: The Supporting Link in Grassroots Development, Thomas F. Carroll, (Kumarian Press, 630 Oakwood Ave., #119, West Hartford, CT 06110, 1992), is a field-based study of non-governmental organizations working effectively in grassroots development.

The Art of Association: NGOs and Civil Society in Colombia, Marion Ritchey Vance, (IAF 1991), describes the evolution of non-governmental organizations in Colombia and their important role today in giving the poor a stake in their society and a voice in how the resources and power of that society are used. The Spanish version is: El arte de asociarse: Las ONG y la sociedad civil en Colombia (IAF 1992).

The Small Farmer Sector in Uruguay: A Partnership in Development Cooperation, Cynthia L. Ferrin, (IAF 1989), discusses how small farmers have made a “comeback” with the assistance of cooperatives, marketing, and representative organizations. The Spanish version is: El sector de los pequeños productores agropecuarios del Uruguay: Socio para el desarrollo (IAF 1990).
Development and Dignity, Patrick Breslin, (IAF 1987), is a study of the IAF’s first 15 years from the point of view of Latin American and Caribbean observers and grantees.

Bottom-Up Development in Haiti, by Robert E. Maguire, (University of Kansas 1995), stresses the importance of human, rather than simply material, development, and includes a case study carried out in Le Borgne. The Creole version of the book is: Devlòpman Ki Soti nan Baz nan Peyi Dayiti. Both publications are available through the Mount Oread Bookshop, University of Kansas, Lawrence, Kansas 66045, phone: (913) 864-4431.

They Know How… an Experiment in Development Assistance (IAF 1976 and 1991), is a synopsis of insights gained from IAF experience in supporting the initiatives of Latin American and Caribbean organizations during the Foundation’s first five years. It documents the effect of a pioneer development strategy accomplished in partnership with, and responsive to, the very people it is meant to help.

Grassroots Development, the journal of the InterAmerican Foundation, reports on the experiences of IAF grantees, and analyzes development issues. The journal is published in English, Spanish, and Portuguese, and is available at no cost to the reader.

To receive Grassroots Development, the current Year in Review, the index, books, or monographs published by the IAF, write to:

Inter-American Foundation
Dissemination Unit

Arlington, VA 22203, USA

Requests for books published by commercial publishers must be made directly to the publisher.
The mission of the Inter-American Foundation (IAF) is to promote sustainable grassroots and local development throughout Latin America and the Caribbean. To that end the IAF awards grants to non-governmental, private, and nonprofit organizations in Latin America and the Caribbean for innovative programs that support self-help, participatory, local development initiatives. The IAF is pleased to announce its grant program for Fiscal Year 2000, from October 1, 1999 to September 30, 2000 and invites institutions in Latin America and the Caribbean to submit applications to obtain grants during Fiscal Year 2000.

As a pioneer in grassroots development, the IAF looks to support programs that can serve as models for improvements in diverse areas, such as agriculture, food production, micro-enterprise development, and education. The purpose of the IAF grant program is to explore new alternatives in development and poverty reduction based on: participation, initiative from the grassroots, and the formation of multi-sector partnerships involving community groups, non-governmental organizations (NGOs) local governments, and businesses. IAF experience has demonstrated that each project can be a catalyst for change, producing results not only for individuals, but organizations and society in general. Therefore, in awarding grants, the IAF looks to support projects that work on a local level, but have the potential to offer lessons and experience to others, beyond that sphere.

Grant applications submitted to the IAF will undergo a competitive review process and be judged according to how they match the Foundation’s program priorities of local development, social investment, and the specific criteria indicated below.

Local Development
The IAF defines local development as a participatory process that addresses a wide range of social, economic, and environmental problems or needs within a given geographic territory (municipality, canton, commune, province, district, region, etc.) with the purpose of improving the inhabitants’ quality of life. Local development leaders include institutions and organizations acting systematically within a territory to address priority community needs. Examples include local governments, non-governmental organizations, community associations, foundations, churches, educational institutions, and other civil society entities, such as representatives from the private commercial sector and other public or private institutions having a presence in a given location.

Local development is an effective strategy for carrying out sustainable, long-term activities to improve the quality of life of low-income populations and the community in general. Local development is a means of mobilizing local and national resources while strengthening democratic practices and local solidarity. Moreover, it offers citizens the opportunity to develop a common vision and determine priorities for public investment in their community. Local development depends on state reforms that ensure decentralization, open and direct elections of local and regional authorities, and respect for the rule of law. Finally, effective, sustainable local development depends on the participation of the private sector and civil society as full and equal partners with local and regional governments.

The IAF’s local development strategy in Latin America and the Caribbean seeks to strengthen the coordination of efforts aimed at poverty reduction through the creation and promotion of alliances, partnerships, committees, and other forms of collaboration among local figures supporting activities designed to achieve direct, tangible results for underprivileged populations. Therefore, proposals can address a range of social, economic, or environmental issues, according to local priorities and must be designed to produce tangible results to benefit the poorest sectors of the area.

Social Investment
For the IAF, social investment constitutes private sector support for social and economic development. Above all, this refers to poverty-reduction initiatives at the local level that improve the opportunities available to all members of society. The concept of social investment gains increasing relevance and importance in a democratic, decentralized context of the free market and trade, amidst macro-economic balances. In Latin America and the Caribbean, the private sector has replaced the state as the main engine of economic growth. Along with this comes a direct responsibility for business to participate actively in promoting economic and social development to reduce poverty.

The IAF seeks to establish alliances with representative private sector organizations to co-finance local development programs. In addition, the IAF is interested in supporting projects that incorporate representatives of the business sector as partners, together with local governments and civil society organizations, in an effort to find practical sustainable solutions to the problems of poverty and environmental degradation.

Criteria for the Analysis of Grant Requests
The IAF will consider proposals that meet the following basic criteria:

- Grant activities must be designed to create tangible results that provide measurable benefits for the poor. The IAF will not consider grant applications that have as their principal objective the performance of studies, research, diagnoses and/or training. Grant activities must be designed to result in specific benefits aimed at improving the conditions of the underprivileged.
- Grant applications must include counterpart funding and support from a local entity belonging to one or more of the sectors participating in the project.
• Grant applications must identify and describe the sectors or partners participating in the project, such as local governments, non-governmental organizations, churches, educational institutions, community groups, businesses, etc., and the manner of their participation in the project.

• The IAF will give preference to grant applications that demonstrate that diverse local participants have made prior collaborative efforts to form alliances and define priorities.

• Grant applications seeking financing for basic services, such as education, health, environmental protection, and credit, must include in the grant proposal a feasibility study and plan for continuing these services once IAF funding has concluded.

• IAF grants are considered a one-time contribution. The objectives contemplated in the project must be achieved within a predetermined period of time, normally no longer than three years.

• The IAF gives broad preference in awarding grants to organizations that have not previously received IAF funding.

• Local development projects must have the support of local governments and the local private sector. Project proposals must include documentation to demonstrate such support.

• The IAF supports projects throughout most of Latin America and the Caribbean. However, the IAF does not fund projects in Costa Rica, Chile, Uruguay, the English-speaking Caribbean, and Suriname.

Terms for Submitting Grant Applications
The IAF has scheduled two periods or cycles for submitting and processing grant applications for Fiscal Year 2000.

• The First Cycle of Fiscal Year 2000 comprises the period October 4, 1999, to March 3, 2000. To be considered for the first cycle, grant applications must be received at the IAF between July 5, 1999 and October 4, 1999. Grant applications received before or after these dates will not be considered for the first cycle and will be returned.

• The Second Cycle for Fiscal Year 2000 comprises the period March 6 to July 31, 2000. In order to be considered for the second cycle, grant applications must be received at the IAF between December 4, 1999 and March 3, 2000. Grant applications received before or after these dates will not be considered for the second cycle and will be returned.

Original grant applications must be sent directly to:

Inter-American Foundation
Program Office
901 North Stuart Street, 10th Fl
Arlington, VA 22203, USA

The IAF will not accept grant applications submitted by fax or e-mail.

For instructions on the preparation of grant proposals to the IAF, please refer to the IAF Guidelines for Grant Proposals on page 42. The guidelines and information on IAF programs and criteria for project financing for local development or social investment can also be downloaded from the IAF Website at http://www.iaf.gov.
Guidelines for Grant Proposals

(Fiscal Year 2000—October 1, 1999 to September 30, 2000)

I. **EXECUTIVE SUMMARY / PROJECT PURPOSE**
   Present a clear summary of the purpose of the proposal, the main participants and the beneficiaries, as well as the partnerships that will carry out the project.

II. **DESCRIPTION OF THE ORGANIZATION PROPOSING THE PROJECT**
   A. Describe the organization’s mission, structure, and governance.
   B. Describe the organization’s track record, achievements, and future plans.
   C. Describe the organization’s institutional capacity to undertake a project such as the one being proposed.

III. **PROBLEM TO BE ADDRESSED BY THE PROJECT**
   A. Describe the problem to be addressed by the project and the current situation of the intended beneficiaries.
   B. Describe and provide an analysis of the context surrounding the proposed project.
   C. Describe the relationship between the organization proposing the project, the problem which prompts the presentation of this proposal, and the intended beneficiaries. Describe the participation of the beneficiaries in the identification of the needs to be addressed by this project, as well as in the design of the project.

IV. **THE PROJECT TO BE CARRIED OUT**
   A. Describe the project, its goals and objectives.
   B. List the anticipated project results in tangible and measurable terms, as well as the anticipated impact these results will have on the beneficiaries. Describe the conditions affecting the beneficiaries at the start of the project and the changes which this project will bring about.
   C. Describe the project work plan and implementation schedule.
   D. List and describe existing partnerships, as well as partnerships to be formed for the implementation of the project, and the role each partner will play in the implementation, financial support and resource mobilization for the project. Describe how the partners will work together in the project.
   E. Explain how the project will continue to function after funding from the IAF has ended.

V. **LEARNING PLAN**
   A. Describe what the proponent organization and its partners expect to learn during the course of the execution of the project.
   B. Describe the methodology and instruments which will be used to gather results data, and the manner in which project results will be measured.

VI. **BUDGET**
   The project budget must list, by line item, the amount requested of the IAF, the quantifiable and not speculative counterpart funds to be provided by the proponent of the project, as well as the amounts to be provided by the partners that will participate in the project and the intended beneficiaries. List additional resources which may be mobilized during the course of the project. Counterpart contributions can be stated in cash or in kind (goods or services) provided that these contributions can be verified and quantified.
